

Product Information Sheet

Product

Coasters

Product composition

White or coloured tissue made out of 100% virgin pulp

Packaging

Inner: Polyethylene (PE)

Outer: Corrugated board box

Intended Use

Using a tissue paper coaster is a simple, disposable way to protect surfaces from condensation caused by cold beverages or from minor spills.

Packaging and Packaging Waste

The packaging comply with all essential requirements set out in Directive 94/62/EC on packaging and packaging waste, as well as the forthcoming Packaging and Packaging Waste Regulation (PPWR), Regulation (EU) 2025/40.

Product Safety

The products fulfil the following:

- Regulation (EC) No. 1935/2004 on materials and articles intended to come into contact with food.
- EU Regulation 2023/2006/EC (GMP)
- BfR-Recommendations on Food Contact Materials, XXXVI. Paper and board for food contact.
- Coloured and printed products are tested according EN 646 (Determination of colourfastness of dyed paper and board) and has been found to have good fastness.
- Duni manufacturing units are certified according to the international quality system ISO 9001 and environmental system ISO 14001 as well as to BRC Consumer Products.

Environmental Aspects

The tissue used for the coasters is manufactured from Totally Chlorine Free pulp (TCF), or/and Elementary Chlorine Free pulp (ECF), i.e. bleaching chemicals used are oxygen, hydrogen peroxide, chlorine and ozone. The pulp is white or dyed.

PFAS (per- and polyfluoroalkyl substances) are not intentionally being used in any step of the manufacturing of the coasters.

The product is FSC certified according to "Mixed Sources" certification number DNV-COC-000148.

Polyethylene is used for packaging purposes, and the corrugated board box is unbleached and to a large extent made of recycled fibres.

Product End of Life

Collection, sorting and material recovery are all part of the recycling process. Recycling is dependent on local waste handling infrastructure. Ease and recyclability of a product depend on the type of material, composition and sometimes color.

The packaging material can be recycled as paper and plastic respectively. Used products should be handled according to local regulations. Some areas may allow products to be disposed with food waste, but to be sure, please check with local waste handling company.

Validity

This is issued 2026-03-12. It is revised when there is a change in the manufacturing process, in the product or in legislation.
